

*Cardio Thoracic Surgery*

THE SCIENCE OF SPECIALISATION.  
THE ART OF CARING.

**Application Devices**

GEM was formed in 1994 with the goal of marketing and producing innovative surgical adhesives in order to anticipate the requests of an ever more sophisticated market. Glubran® 2 is a synthetic biodegradable cyanoacrylic-based surgical glue that is ready for use in open and laparoscopic surgery, and may be used as an embolizing agent in radiology and vascular neuroradiology. Glubran® 2, with its high adhesive and haemostatic properties proved in over ten years of scientific studies, is versatile, efficient and reliable.

**Reflex®  
Skin Staplers**

Conmed Corporation is a global medical technology company that specializes in the development and sale of products and services that allow physicians and customers to deliver high quality care and as a result, enhanced clinical outcomes for their patients. Conmed has developed unique ligation and stapling devices to meet the needs of laparoscopists and surgeons world-wide.

Unique Technologies designs, manufactures, and distributes an array of precision micro-surgical cutting instruments and offers a line of blades and knives that provide tremendous value and consistently meet or exceed customer expectations.
